

GEPS® FOR INDUSTRY

Asset Management
Production Logistics
Fleet Management
Safety

VALUE AND ROI

- Improved asset utilization 20%
- Reduced capital tied up in material 2-4%
- Reduction of manual handling 10%
- Increase production capacity 0,5-5%

"H&D Wireless is a strategic partner in the Smart Factory Lab. We use H&D Wireless technology in order to track and trace our products, our trains and our forklifts. With the data gathered in real-time we can make well founded decisions and keep our leading position within the truck industry."

Prof. Dr MSc ME Lars Hanson, Scania Smart Factory.

GEPS for Industry is a dedicated service based on the Griffin Enterprise Positioning Services. A real-time positioning system for Industry 4.0, retail and large facilities. The GEPS Visualiser Production Logistics Assistant leverages GEPS RTLS capabilities and extends them with a dedicated and comprehensive service that supports planning and validation of processes in manufacturing. The service provides real-time monitoring and analysis of the production logistics and helps to identify and eliminate bottlenecks that might lead to delays
